3. Outline

Urban and industrial policy is a tool for government to develop city and industry. The efficiency of the policy can give a territory a possibility to be a more competitive. So it is very important to investigate the most successful experience of urban and industrial policies and be able to choose the most useful in each case. First of all it is important to consider the types of urban and industrial policy. These types are depend on country and specialization of its economy. What is more interesting is how an efficiency of the urban and industrial policy could be identified. The scientific articles with the international and Russian experience will be studied. After this a possibility of original research will be appraised. Then students will collect data and do the own analysis. The results of this work will be presented in the end of the course. Some results could be used in students' thesis.
