(CHEMP)***

Research Seminar Series 2016-17

6th September 2016
16.30 – 18.00

All welcome. No registration required.

***Self-Assessed Health Shocks
and
Labour Market Outcomes: Evidence for Russia***

Ekaterina Aleksandrova

Abstract: This ‘work in progress’ paper explores the influence of self-assessed health shocks on labour market outcomes (wages earned and hours worked). We apply propensity score matching and estimate difference-in-differences equations using RLMS-HSE data for the period 2001-2010. We find evidence that health shocks lead to a reduction in wages and hours worked, but that the results are sensitive to measurement.

Location: HSE University Saint Petersburg, Room 246, 3A Kantemirovskaya Street.
