

Instructions for connecting to the HSE.Student Wi-Fi network for Windows devices

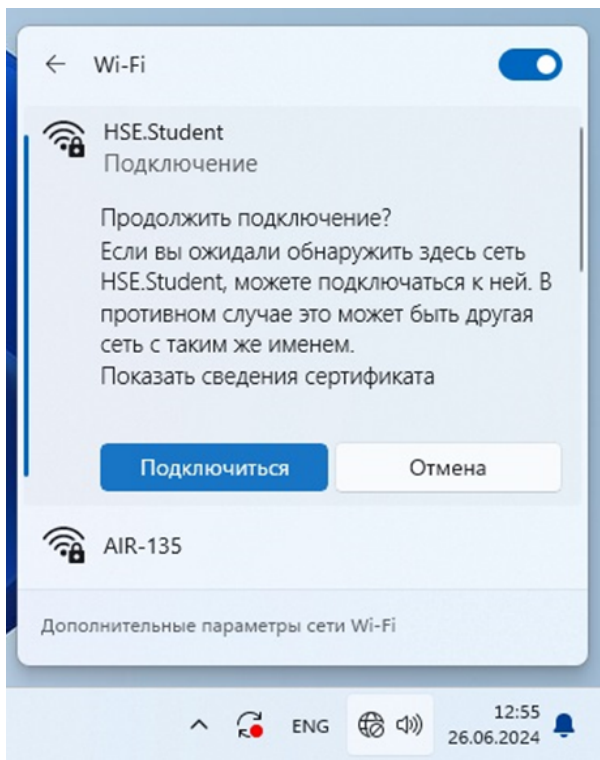

To set up a connection on a Windows device, select the HSE.Student network from the list of available connections and click the "Connect" button in the system menu. To connect automatically in the visible area of the wireless network, you must specify the "Connect automatically" option:

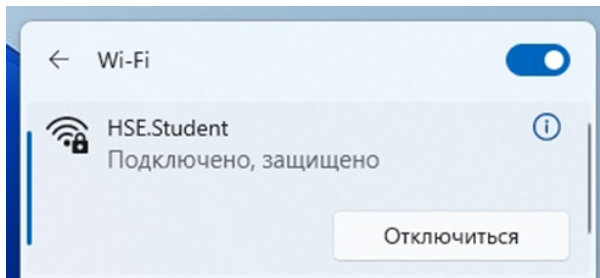

To log in to the network, you must specify the name of the mailbox and the password of the HSE student mail.

When the menu for viewing the certificate information appears, you must additionally click on the "Connect" button.

If the username and password are correct, you do not need to specify any additional parameters when configuring the connection. The connection parameters are determined automatically.

If errors occur during the authorization process, you should check the correctness of the credentials used. To do this, log in to the HSE student mail system via the web interface using your username and password.

To get help with using the university's digital services, apply to the Digital Services Support Hotline:

- Through Smart Point,
- By e-mail - write to digital@hse.ru,
- By phone - call +7 (495) 625-50-15 or the multichannel number +7 (495) 772-95-90 *55555.

**When connecting to wi-fi in a Windows PC with a corporate account, you must enter your username and password in full (login in the format login@edu.hse.ru).*
